1.0 Introduction

The County Government of Lamu has set aside funds for the financial year 2016/2017 for provision of survey services to Rubu & Mwambore Settlement Scheme in Lamu East Sub-County. The main objective of the project is to enhance security of tenure through formalization of claims on public land. In order to achieve this, the County Government intends to procure provision of survey services for cadastral survey of the mentioned area.

2.0 Provision of Survey Services to Rubu & Mwambore Settlement Scheme

The scope of services will require the consultant to:

- I. Include personnel from the National/County Ministry of Land and National Land Commission to undertake reservation of land, stakeholder sensitization, identification of beneficiaries, dispute resolutions and project supervision.
- II. Undertake a survey data search of all existing surveys in and around the project areas.
- III. Identify and recover existing survey control points in and around the project areas suitable for use as datum points for establishment of controls for the projects.
- IV. Establish survey control points and undertake the controls survey sufficient to place block corner beacons in the whole project area(s).
- V. Establish and survey block corner beacons to delineate all roads.
- VI. Survey and Beacon all plots, show the beacons to beneficiaries and issue beacon certificates where applicable.
- VII. Compile the resulting survey data, field notes, computations, survey plans, list of beneficiaries and submit them to the County Government for further action.
- VIII. The consultant will be expected to follow up the approvals.
- IX. Follow up preparation and approval of Deed Plans /RIMs in liaison with County Surveyor.
- X. The projects are expected to be completed as shown in the implementation plan.

The County Government of Lamu invites eligible consultants, who must be firms of Licensed Land Surveyors, to indicate their interest in providing the services.

3.0 Methodology

The process of undertaking survey and regularization of the village should be guided by the following:-

- I. Existing legal framework

- II. Benchmarking for best practices
- III. Public participation
- IV. Multi-sectoral/Multidisciplinary approach
- V. Project development objectives
- VI. Terms of Reference.

4.0 Expected Outputs
